

APPENDIX C

**State of Alaska
Department of Transportation and Public Facilities (DOT&PF)
Mining and Reclamation Plan**

St. Michael Airport Rehabilitation

Materials Site Plan

General Site Description:

Halfway Mountain Material site lies 2.8 miles east of the airport. This proposed material site covers approximately 15 acres.

Project Description:

- Resurface runway, taxiway, apron, and safety areas,
- Widen runway safety area from 120 to 150 feet,
- Widen taxiway safety area from 79 to 118 feet,
- Construct precision approach path indicator (PAPI) and runway end identifier light (REIL) pads,
- Realign and widen airport access road,
- Expand apron and aviation support area, and
- Apply a dust palliative.

Methods of Operation:

Approximately 265,000 cubic yards of material will be hauled during construction from Halfway Mountain along the Stebbins/St. Michael Road to the project site (see Figure 6). Appropriate benching and side slopes will be constructed. Material will be stockpiled on developed land within the material site boundary. No material will be stockpiled at the airport.

Mining Restoration Plan

The gravel will be extracted from an existing pit that is currently developed. It is not anticipated that this pit will need to be expanded, and so no wetlands will be impacted from its use. The material removed for this project is anticipated to lower the level of the pit approximately nine feet. Any permanent waste piles will be recontoured to match the surrounding natural ground surfaces.
