

East Dowling Road Extension & Reconstruction

Public Meeting No. 2

October 30, 2006 from 6:30 – 9:00 p.m.

The State of Alaska Department of Transportation and Public Facilities (DOT&PF) and DOWL Engineers invites you to a public meeting regarding the East Dowling Road Extension & Reconstruction. The purpose of this project is to provide additional road connectivity and relieve congestion on Anchorage's east side roads. Construction of a connection to Abbott Loop Road would reduce the amount of traffic passing through the Lake Otis Parkway and Tudor Road intersection (a major congestion area) by providing an alternative routing for traffic between east and south Anchorage.

PROJECT UPDATE

Since the initial public meeting in March, the project team has been completing environmental and engineering design studies on the road. Field studies were conducted to identify wetlands, hazardous materials, and noise levels in the vicinity of the proposed road corridor. Traffic studies and preliminary engineering studies have also been completed. In addition, the team met with the environmental resource agencies to discuss potential alignments and to discuss the environmental studies completed. Information on the work completed to date is available on the website under Documents/Reports.

PUBLIC MEETING PURPOSE AND FORMAT

This public meeting will present the results of the preliminary engineering and environmental studies and allow for public comments and questions. Public Meeting No. 2 will be held on October 30, 2006, from 6:30 – 9:00 p.m. at Wendler Middle School, 2905 Lake Otis Parkway. This meeting will include an open house with a presentation at 7:00 p.m. followed by public comments/questions & answers.

ADDITIONAL INFORMATION

Project information is available for review at the Project Information Office at 4041 B Street and project website at www.eastdowling.com.

Sign up for the project mailing list or e-mail list to receive project fact sheets, updates and meeting notices.

PROJECT PHASES AND SCHEDULE

Project Scoping

January – March 2006

Preliminary Engineering Study

March – October 2006

Environmental Documentation & Permitting

March 2006 – February 2007

Design

July 2006 – August 2007

Bidding

August 2007 – November 2007

Construction - 2008
